

Blackburn Wood Firebox

Blackburn Wood Firebox

Blackburn Wood Firebox

Introducing our latest product line: the Blackburn Wood Firebox Collection. We are proud to unveil three new sizes, specifically designed to enhance your fireplace experience with a larger viewing area than other models. Our 36", 44", and 54" wood fireboxes are meticulously crafted to provide an unparalleled visual display of the fire, bringing warmth and ambiance to any space.

For those seeking a traditional touch, our fireboxes offer classic brick or herringbone refractory panels in four colors: natural concrete, white, mocha, and black. These liners provide a warm and rustic appearance, reminiscent of traditional masonry fireplaces. In addition to our traditional liners, we are offering a smooth surface refractory for those seeking to create a more neutral contemporary design. The smooth surface and clean lines create a minimalist aesthetic that effortlessly blends with a wide range of interior styles.
