- Zero Non-Combustible

Double Glass Safety

The U50TU has a second layer of ultra clear glass that provides a layer of surface protection between your fireplace and your loved ones.

No Steel Pillars

Instead of obstructing the corners of the glass firebox with thick metal beams, the U50TU uses a glass to glass seal that lets you enjoy the fire from any angle.

No Gaps in Glass

Rather than using pegs that create an unsightly gap towards the bottom of the glass, the U50TU is designed with a seamless top-to-bottom construction with no rattle.
